JS
Bash
C
C++

PENETRATION TESTING
Burp
Metasploit
nmap
Sqlmap
ZED Attack Proxy
Kali

Education

Greater Noida Instute of technology
B.Tech Computer Science 2018
High School with 9.3 CGPA from Deoria Senior Secondary School
Intermediate with 74.6 % from Deoria Senior Secondary School

Projects

Tweetme   Apr 2017 to May 2017
Tweetme is a platform kind of mini version of twitter where one can post tweets, retweets and follow users. It is made on Django platform with Advance features like REST Framework, AJAX Search, Class-based views.

Notes   Feb 2017 to Mar 2017
I made this very basic project while learning Django , It a blogging and Notes uploading website for college students and teachers where teachers can upload the Notes and students can see them according to their particular year and branch .

Watch Bug
It is a Django project which gives the user the ability to upload the codes and bugs kind of pastebin.com but with a comment feature so that user can see add other description about the bugs . I have added this with CRUD feature so that the codes not only get retrieved but can be edited easily.

Grok-Debugger   Mar 2017
Grok Debugger is basically a real time log parser that uses python regex and pygrok and is helpful in debugging the grok pattern that can be used to parse the log files(currently under development phase)

Shipping Monk   Feb 2017 to Feb 2017
Shipping Monk is a platform for the users of the 21 century with a goal to reduce the shipment delays and product unavailability. Thus follows a tag line of "don't miss it just ship it". This is done by creating hubs around certain parts of the city where a user can store their product if they are not around or the product is not available in his locality but is present nearest to his hub.

Awards

Shree Tech Solution · 2nd runner up in CTF (Capture the flag)   Feb 2017
A CTF event organised in AMITY University in which one is supposed to capture the flags using some tricky question, I played it becamethe 2nd most highest flag collector.
